

Why we choose Flutter?

- You can easily create a modern UI like a mobile app
- Supporting cross-platform (Desktop, Mobile, Web)
- Flutter is popular OSS and there are a lot of information
- Flutter is natively compiled applications (Fast!)
- Flutter provides the custom embedder API-layer for specific platforms
 - <https://github.com/flutter/flutter/wiki/Custom-Flutter-Engine-Embedders>
- Fewer library dependencies (Flutter Engine)
 - Basically your platform needs only OpenGL/EGL library
- Software license is BSD 3-Clause
